

Payton Guida

Major:

I'm majoring in **General Business** because I'm still exploring what career path I want to pursue after graduation.

I'm the kind of person who learns best by trying things out, so I'm keeping an open mind.

Right now, I'm interested in fields like **accounting, marketing, and real estate.**

Recently, my sister and I started a small business handmaking candles. Eventually, I hope to apply my knowledge in business studies to grow our brand and open a boutique.

Technology History:

I have a decent understanding of technology for someone my age. Meaning, I am comfortable using both phones and computers, and I have experience with platforms like **Google Workspace** and **Microsoft Office**. I use technology for school—using platforms such as Google Docs and Sheets. When assignments need formats such as Microsoft Word or PDF, I will download them to my file explorer as that file type.

Bucket List:

Some of my bucket list items include going to a concert for the first time, riding a hot air balloon, going skydiving again, and going to the Grand Canyon. My long-term dreams include growing my candle brand into the apothecary business, being successful enough to buy and renovate a fixer upper home and having a family of my own.

Hobbies:
